

Life Counter Website

Magic: The Gathering | Smart Solutions

Puja Chimariya and Bryan Nelson | CIS 641

1. Sequence Diagram

Scenario: subtract 5 life points from a current total of 20.

The UI sends the requested amount to LifeCounter.

LifeCounter updates the total, and the UI shows the result.

Initial design for the basic life tracking features.

2. State Machine Diagram

Object modeled: LifeCounter

Life changes keep the counter in Tracking Life.

Reset returns it to Initialized with 20 life points.

Labels show the event followed by the action after the slash.

Scope: life tracking only. Game outcome rules are not included.
