Multiplayer Life Counter — CRC Cards

Puja Chimariya and Bryan Nelson

Conceptual design roles aligned with the multiplayer class diagram; these are not literal JavaScript classes.

1. Website UI

Responsibilities	Collaborators
Display player cards, names, amounts and life totals.	Player, Player Management
Handle Add, Subtract, Add Player, Remove Player and reset controls.	Player, Player Management
Display input errors and disable removal at two players.	Player, Player Management

2. Player Management

Responsibilities	Collaborators
Initialize two players and add new players at 20 life.	Player, Website UI
Remove players only when more than two remain; renumber remaining players.	Player, Website UI
Reset all life totals to 20 while preserving names and player count.	Player, Website UI

3. Player

Responsibilities	Collaborators
Represent player ID, name (up to 40 characters), life total and adjustment amount.	Website UI, Player Management
Add or subtract valid amounts for the selected player; reject invalid amounts or unsafe totals.	Website UI
Reset individual life to 20 and amount to 1; preserve name.	Website UI, Player Management
